Software Languages: C# (C Sharp), JavaScript ES6 (TypeScript), Python, Powershell

Frameworks: ASP.Net, ASP.Net Core, Blazor, React.js, Next.js, Flask, Django

Tools: Visual Studio, Visual Studio Code, Microsoft SSMS, Azure, Azure DevOps, Git, GitHub, Linux, Ubuntu, MongoDB/Mongoose, Google Cloud, Postman, Jira, Agile, and MS Office

Certifications: Project Management Professional (PMP) - PMI, Advanced Full Stack Developer Certificate - Python

PROFESSIONAL PORTFOLIO APPLICATION

Professional Portfolio - Software Developer

Technologies: JavaScript (TypeScript), Next.js, Tailwind CSS, Vercel

Site: <https://portfolio-main-fe.vercel.app/>

- Designed Next.js application with Tailwind to visualize past projects.
- Successfully deployed application to Vercel, ensuring optimized performance.

EXPERIENCE

Full Stack Developer – Medical Solutions

12/2024 – Present

Technologies: C#, SSMS, SQL, Azure DevOps, Azure, Postman, Visual Studio, VS Code

- Modernized legacy application by seamlessly upgrading to the latest .NET packages, enhancing performance and maintainability.
- Migrated Xunit testing framework to NUnit, optimizing test efficiency and alignment with company standards.
- Implemented consolidated applications first metric endpoint
- Conducted in-depth research into database migrations, system architecture, and functional consolidation, establishing a strong foundation for innovative solutions.
- Refactored to mirror iDesign principles in application development

Full Stack Developer - Unite Digital Remote

08/2022 – 11/2024

Technologies: C#, React, Typescript, SSMS, SQL, noSQL (CosmosDB), Azure DevOps, Azure, Postman, Azure Functions, Visual Studio, VS Code, Next.js, Bootstrap, Jira, Jest

- Developed features, REST Api endpoints, fixed bugs, conducted unit testing, and eliminated technical debt using C#, React.js, FTP / SFTP, and Azure ecosystem.
- Led module development for Dealer Settings Module. Ensured team successfully expanded module capabilities to meet client requirements.
- Contributed to scoping our application frontend upgrade to Next.js as integral part of the Dashboard 2.0 initiative.
- Supported DevOps and managed bi-weekly application releases.
- Collaborated with cross-functional teams utilizing Agile Scrum to drive project success.
- Managed tasks through Jira ensuring the delivery of high-quality software solutions.

Software Engineer – Divergent Remote

02/2022 – 08/2022

Technologies: Python, Flask, Salesforce, Lightning Web Components, Git, GitHub, VS Code, Postman, Bootstrap

- Developed, tested, and deployed new customer portal native to Salesforce. This project required development of Lightning Web Components for integration.
- Completed the Health Data Services and Azure API for FHIR Intermediate Level Classroom and Hack training.
- Developed LWC: PowerBI single sign on experience and a Youtube API integration for a content feed. Stood up the necessary Azure, PowerBI, and Youtube infrastructure.
- Deployed two client portals, both with custom components tailored to each client specifications.
- Increased testing coverage for proprietary applications in Django and Flask.
- Participated in the annual SOC 2 audit.

Full Stack Developer – Code Fellows Remote

06/2021 – 02/2022

Technologies: Python, Django, Node.js, React.js, Insomnia, Git, GitHub, MongoDB, VS Code, Linux, Ubuntu, Trello, HTML, CSS, Bash

- Completed 401 Advanced Python Software Development course.
- Completed and presented multiple projects which include: Coders Pursuit, Celstiality. Speed Typing, and Banana Dungeon.
- Executed data analysis techniques with Numpy, Pandas, Scikit-Learn, Machine Learning, and Linear Regression.
- Performed Data Visualization with Matplotlib and Plotly.
- Deployed sites frontend and backend on Heroku, Vercel, and Netlify.
- Experimented with Dev Ops: Docker Containers.
- Learned Frameworks & Development Patterns for Django, Node.js, and React.js.
- Learned data structures & algorithms: Linked Lists, Stacks & Queues, Graphs, Trees, Binary Search, and Sorting.
- Received instruction and practical application in Python syntax, classes, control structures, lambdas, decorators, iterators, generators, and Jupiter notebooks.
- Received instruction on MVC Structure and OWASP Top 10 Web App Vulnerabilities.
- Received instruction on virtual environments, managing dependencies, and git version control.
- Received instruction on Object Oriented Programming (OOP), CRUD, RESTful Apis, database management

Project Manager – US FUSION & Specialty Construction

06/2019 – 07/2021

- Lead scope identification and change management, cost estimation and management for projects from \$2K to \$10M. Led commercial and communication management for multiple concurrent projects along the gulf coast while operating remotely.
- Designed excel application to manage changes to scope, cost, and documentation. This application was applied to monitor a successful \$2M HDD pipe installation project resulting in equipment, labor, and subcontractor costs 20% below estimated margins.
- Mentored and trained aspiring project leaders in project management processes, cost estimation, and blueprint reading.

Senior Project Coordinator – Zachry Group

05/2018 – 04/2019

- Controlled motor run-ins program, planned and coordinated to effectively manage resources and deliver the project on-time (the only program to do so).

Rotational Project Engineer – Trio Electric

02/2016 – 04/2018

- Planned change management and resource management of multiple commercial electrical projects from \$10K to \$5M in scales. Under guidance of project manager, assisted in communications management and cost management documentation for submission to corporate stakeholders.

Company Commander (Program Manager) – Texas Army National Guard

12/2006 – 12/2017

- Led 35 personnel for an aviation company of 8 Apache helicopters, mentored and monitored training on: tactical and office operations, flight instruction, and safety.
- Oversaw flight resources for 300+ flight hours for 60+ missions, supporting over 3,000 soldiers at keystone event.
- Led the company to achieve an excellent rating and contributed to its ranking as #3 out of 50 aviation units in an operational inspection.
- Selected ahead of peers for promotion to Captain and Battalion Commander's first choice for next Company Command.

EDUCATION

University of Houston, B.A. English – Linguistics
